FROM THE PUBLISHER

Permission to copy all of Saint Joseph, Broadalbin, NY, parish burial records was granted by Father **Morrette**.

Copying the records is the most critical step in the process and requires many hours to complete because some of the early records are fragile making it difficult to handle them. The parish records were copied by and with the helpful cooperation of Mrs. Marion **Walag**, parish secretary.

We are grateful to all the volunteers who worked long, tedious hours to produce the repertoire you are holding. As you can see below, there are several phases of production that go into the making of a repertoire.

Photocopying Records: David L. **Bonitatibus** and Joseph David **Schmid**.

Data Entry: Kathleen Gallagher **Brearton** and Marcel **Coté**.

Proofreading: Kathleen Koza **Garbo**, Lynn Carey **Grice**, and Lois Cruden **Yunker**.

Proofreaders Printouts & Data Corrections: Pauline Genest **Coté**.

Printing Master: Pauline Genest **Coté**, and Gerald **Savard**.

Forward: Julie **Smith**

History: David L. **Bonitatibus** and Julie **Smith**.

THIS BOOK AND ITS CONTENTS

This *répertoire* contains 1092 burials that took place from June 1890 to July 2003. However, records from December 20, 1930 to January 1936 (6 years) are missing. Also included with St. Joseph are the mission burials of St. Mary Galway, NY from January 1978 to August 1985.

Our policy when producing a burial *répertoire* is to extract as much genealogical information as possible from these records. Some records have very little information and others are brimming with genealogical data. It is not our policy to second guess a pastor's intent 100 years ago. When in doubt, we enter the record as we see it and leave the decision of usefulness to the researcher.

It is also our practice to enter the data as it appears in the original document, however, if there are discrepancies that cannot be resolved as a transposition or typographical error, the researcher is encouraged to contact the parish priest to ask for permission to see the original documents. If, with all our data entry and proofreading experience, information cannot be deciphered, we leave the final choice to the user of the information.
