Immaculate Conception Parish Burials Schenectady, New York

FROM THE PUBLISHER

This is another new *répertoire* in a series of about 30 parishes from which David L. **Bonitatibus** received permission to copy the church records of Immaculate Conception in Schenectady, NY from Rev. Robert **DeMartinis**, the current pastor.

Special thanks go to Danielle **DePaula**, Pastoral Associate for Administration. Her invaluable assistance ensuring that we had ready access to the church records made this transcription project possible.

David, David's mother Sioban **Dussault Bonitatibus** and Joseph E. **Schmid** started copying these records in sequence with the other churches in the Schenectady/Albany area.

This is a critical step in the process and requires many hours to complete. Each page is checked to be sure no information is omitted from the photocopy. Sometimes the early records are fragile from age and must be handled very carefully.

We are grateful to all the volunteers who worked long, tedious hours in the production of the *répertoire* you are holding. As you can see below, there are many phases of production that go into the making of a *répertoire*.

THIS BOOK AND ITS CONTENTS

This *repertoire* contains 2,543 burials that occurred from August 1905 to February 2005.

Our policy when producing a burial *répertoire* is to extract as much genealogical information as possible from these handwritten records. Some records have very little information and others are brimming with genealogical data. It is not our policy to second-guess a pastor's intent decades ago. When in doubt, we enter the record as we find it and leave the decision of usefulness to the researcher.

It is also our practice to enter the data as it appears in the original document, however, if there are discrepancies that cannot be resolved as a transposition or typographical error, the researcher is encouraged to contact the parish priest to ask for permission to see the original documents. If, with all our data entry and proofreading experience, information cannot be deciphered, we leave the final choice to the user of the information.
